

A Plague to Kill the Nation

19TH FEBRUARY 1349

VOLUME 1, ISSUE 1

A serious case of the "Plague" has shocked the country inside out. Many believe frogs fell from the sky, others think it is a punishment from God. Well whatever has caused this the population is sure to die down.

This plague is said to take affect within two hours of getting infected. The symptoms:

Strange lumps under the armpit and around the groin area, spasm attacks, dark blotches under the skin, coughing blood, vomiting and severe headaches.

If you contract any of these symptoms be prepared to die in the next few days.

A note from the experts: we advise you to keep in your houses.

This may be a difficult task but we do not want the disease to spread any father. If your loved one is infected we advise you to stay with them but not to close to catch it. Once there life has perished burn there clothes to stop the risk of more spreading.

Cures to try:

Lavender oil on the swellings or Bursting them with a stick or wood. For the blotches try rubbing them with grass.

Swallow whole snails to cure the headaches and drink water for the vomiting. These cures have not been tried but it is worth a go.

Below: A photograph taken in the village of Melton, showing many dying and others helping the sick.

The type of rat that flees live on. These fleas are thought to spread parts of the disease.

Dr Miller says :

"This has been the worst disease yet and most of the population will decrease. I have made many a tests and the disease is spreading through the air. It is a fatal disease and I am sure there will be few survivors. This is not a punishment from God. No one has done anything wrong. Please stay calm. It may be spreading through rats as they have fleas. Burn The clothes of the dead and avoid any infected person." Story reported and written by Vicki Welburn— 1L
